

**Prevent loss and monitor your site anytime, anywhere!**

Construction Sentry is a complete video security solution designed for outdoor and wide-area use, with emphasis on the needs of the construction industry. The only solution of its kind, Construction Sentry is easy to install, simple to use and brings the power of the cloud to the challenging tasks of effective project management, real-time security and time-lapse video..

## FEATURES

- ✓ Remote access
- ✓ Instant search
- ✓ Push notifications
- ✓ Alarm verification

## LEASING PROGRAMS AVAILABLE

For more information, contact Construction Sentry today!

### Increase security

Typical police response time can take hours when there is no video available to verify an alarm condition. Construction Sentry ensures priority response thanks to alarm verification.

### Prevent loss

With the industry's only video search engine, finding events is now as easy as searching the Internet. Be instantly alerted to activities you care about, such as theft and vandalism. With realtime alerts sent to your phone or central station, you can prevent crime.

### Perform remote visual audits and record time-lapse

Managing a construction site just got easier with the ability to allow portal access to multiple employees. Perform remote visual audits or monitor site progress by viewing video over time. With the added benefit of federation, manage multiple sites from a single web interface. Video can be viewed via mobile or web anytime, anywhere.

### Benefit from cellular connectivity

Never worry about low bandwidth again! Construction Sentry solutions include cellular connectivity and solar power.
