

Guarding: Smart Security Solutions

Prevent Crime. Respond Faster. Improve Security.

CheckVideo is a comprehensive solution that not only protects your property virtually but acts as support to your onsite guards. With **advanced video analytics** technology, CheckVideo can alert a security guard of potentially threatening activity with a push notification sent to their mobile device. **CheckVideo watches and prevents crime while other cameras just record.** Offering unlimited users and multi-site capability, CheckVideo helps you manage multiple properties from your desk or on the move.

FEATURES

- ✓ Video Analytics
- ✓ Smart Matrix
- ✓ Instant Search
- ✓ Push Notifications

INCREASE SECURITY - Multiply your guard force and improve its effectiveness. With CheckVideo, guards are not tied to a static view of all cameras. You can receive notifications only for those cameras with activity. Now you can respond faster and more effectively.

SAVE TIME - With the industry's only video search engine, finding events is now as easy as searching the Internet. Use the search engine to quickly find activities of interest such as break-ins and vandalism. Gain peace of mind knowing that all relevant videos will be backed up off-site at our secure data center. Now, the threat of failed hard drives and stolen DVR's is eliminated.

IMPROVE AWARENESS - Improve the effectiveness of your guards with situational awareness on the property. CheckVideo cameras can be viewed live from your browser or mobile device and require no additional software. Never lose sight of violators again.

MONITOR MULTIPLE LOCATIONS - With the power of the cloud and video analytics, a single person can watch tens or even hundreds of cameras over a campus or across town.
