

Field Engineer

CheckVideo is an innovative company that is changing the way people interact with and use video security. We help tens of thousands of customers stay safe and secure. Our solutions include advanced video analytics that have been protecting critical sites including airports and utilities for over 18 years, the longest in the industry. Join the team that has been innovating in security and make a difference every day.

CheckVideo is looking for an experienced Field Engineer to manage the project lifecycle from initial design through successful deployment and implementation. You will be working closely with our integration partners to define project scope and schedule, design the right solution, create and submit CAD drawings, oversee the installation and commissioning of the system and train customers on all aspects of the system. The position involves up to 50% travel to customer sites in the US and Canada.

Responsibilities

- Be the subject matter expert on CheckVideo products and solutions.
- Design video surveillance systems that incorporate best practices and video analytics.
- Advise with setup and tuning of video analytics systems.
- Design and document interfaces of CheckVideo products with third party access control, alarm panels and audio.
- Manage commissioning and field installation for large projects and ensure it meets performance standards.
- Train users on system operation and maintenance procedures.
- Diagnose field equipment and provide guidance for troubleshooting.
- Participate in product improvement, development and testing

Qualifications

- A degree in electrical engineering or equivalent technical experience and professional certifications is required.
- At least 5 years of experience as a sales engineer with a manufacturer or as technical project manager/field supervisor with a security integrator.
- Deep knowledge of electronic security systems, specifically IP video and video analytics
- Experience designing and documenting systems with AutoCAD, providing wiring diagrams and coverage maps
- Highly organized with superb customer service mindset; excellent communication skills, both verbal and written.
- Field experience with installation of cameras, cabling and equipment racks is a plus.

Other Eligibility Requirements

- Must pass the Drug Test, the Background Check, and any pre-employment tests as applicable
- Required to obtain and be able to maintain various certifications, licenses and/or registrations, in accordance with applicable state laws and as required by the electronic security regulations in the state(s) which they are working

Equal Opportunity Statement

CheckVideo, a Kastle Systems company is an Equal Opportunity / Affirmative Action employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, or protected Veteran status.
