

20° Wall Mount

Part# 200960

30° Wall Mount

Part# 200852

40° Wall Mount

Part# 200853

Angled mounts for the CV-181 panoramic camera facilitate installation of the camera on a wall to provide a seamless de-warped 180 image. These mounts tilt the view angle downwards to capture more of the ground and are suited for a variety of mounting heights. These mounts are fabricated with ASA polymer that is purpose designed for operation in harsh, outdoor conditions, is widely used in the automotive industry and for making outdoor electrical fixtures. The mounts are UV resistant, will not warp with moisture or heat and have high tensile strength. ASA material boasts excellent mechanical, thermal and electrical properties.

Tensile Strength, Yield (0.125", 0.2"/min)	3850psi - 4200psi
Elongation at Break (0.125", 0.2"/min)	3% - 9%
Heat Deflection @ 66 psi	98° C
Coefficient of Thermal Expansion (flow)	88 microns/m° C
Rockwell Hardness ASTM D785 (Scale R, 73° F)	82
