

Managed cloud video systems cost less and deliver more.

CheckVideo's cloud cameras simplify viewing and management across multiple locations without special software or NVRs. 100% web based with live, playback and video export, on-premise recording, off-site backup & industry-first search engine to find video in seconds. Built-in video analytics notify of suspicious activities. Cybersecurity and updates keep your cameras working like new.

MANAGED SOLUTION - CheckVideo's next generation solution does not require server provisioning, software integration and management, significant time or resources.

MONITOR MULTIPLE LOCATIONS - With the power of the cloud and video analytics, a single person can watch hundreds or even thousands of cameras over multiple locations.

COST-EFFECTIVE - Different legacy systems can drive you crazy. CheckVideo easily combines all your systems into one. Enforces all your policies and is cybersecure.

HEALTH MONITORING- Our devices monitor their own health and alert within minutes if any component, including your legacy cameras, have an issue.

- ✓ Offsite backup – no single point of failure
- ✓ Lower IT and maintenance costs
- ✓ Higher network security and availability
- ✓ Included software and feature updates
- ✓ Unlimited users
- ✓ Unlimited locations
- ✓ Unlimited number of cameras
