

Automotive: Smart Security Solutions

Increase Safety and Security for Automotive Dealerships.

CheckVideo is a comprehensive solution that not only protects your auto dealership virtually but helps to protect your bottom line. With **advanced video analytics** technology, CheckVideo can alert a security guard or law enforcement and prevent crimes before they escalate. **CheckVideo watches and prevents crime while other cameras just record.** Offering unlimited users and a video search engine, CheckVideo helps you run your business more effectively.

FEATURES

- ✓ Video Analytics
- ✓ Offsite Video Backup
- ✓ Instant Search
- ✓ Push Notifications
- ✓ Health Monitoring
- ✓ No Servers

REDUCE OVERALL SECURITY COSTS- The cost of paying a guard to physically patrol your auto dealership is often more expensive compared to the affordable costs of implementing a virtual guard system.

IMPROVE CUSTOMER SERVICE- Your cameras become a force multiplier. Search for customer activity on your lot. Manage and track personnel, deliveries, and activity on the sales floor.

STAY INFORMED - With push notifications to your mobile phone CheckVideo can alert you to customers coming in or intruders on the property. Using just a web browser you can keep tabs on your dealership from any where in the world.

MONITOR MULTIPLE LOCATIONS - With the power of the cloud and video analytics, a single person can watch tens or even hundreds of cameras over multiple locations.
