

# Oil & Gas: Smart Security Solutions

## Increase Safety and Security for Oil & Gas.

CheckVideo is a comprehensive solution that not only protects your Oil & Gas facilities virtually but helps to protect your bottom line. With advanced video analytics technology, CheckVideo can alert a security guard or law enforcement and prevent crimes or incidents before they escalate. CheckVideo's cloud video solutions allows you to manage your video surveillance system on a secure, reliable and scalable infrastructure, while improving security across multiple sites. Offering unlimited users and a video search engine, CheckVideo helps you run your oil & gas facilities more effectively.

### FEATURES

- ✓ Video Analytics
- ✓ Offsite Video Backup
- ✓ Instant Search
- ✓ Push Notifications
- ✓ Health Monitoring
- ✓ No Servers

**REDUCE OVERALL SECURITY COSTS**- The cost of paying a guard to physically patrol your oil and gas facility is often more expensive compared to the affordable costs of implementing a virtual guard system.

**LIMIT LIABILITY & SAFETY VIOLATIONS**- Find, review, and export footage such as work place accidents. Increase the health and safety of employees, while also safeguarding infrastructure and assets.

**EASILY ACCESSIBLE** - Manage and track personnel, equipment, and activity. With push notifications to your mobile phone CheckVideo can alert you to people and vehicles coming in and out. Find footage in seconds with CheckVideo's revolutionary search engine.

**MANAGE MULTIPLE LOCATIONS** - With the power of the cloud and video analytics, a single person can watch tens or even hundreds of cameras over multiple locations from anywhere.
