

# CLOUD VIDEO MANAGEMENT SERVICE

CVMS

CheckVideo's revolutionary managed service enables centralized configuration, viewing and monitoring of video feeds across tens or hundreds of locations while reducing infrastructure costs. Every video camera enrolled into the service benefits from remote live, playback and export without the need to add servers or install software. Combining the best of on-premise recording and off-site backup, your video evidence is safe.

An industry-first search engine saves hours of time on investigations, and built-in video analytics notify you about activities of interest as they occur, not after the fact. As a managed system, updates are included and automatically applied, and the health of the system is monitored to ensure that your property stays secure.

## CheckVideo Cloud VMS is a hosted software service with:

- ✓ Centralized video management system
- ✓ Web-based viewing and administration
- ✓ Unify cameras across multiple locations
- ✓ 24/7 on-premise recording plus cloud benefits
- ✓ Powerful video search engine
- ✓ Person and vehicle analytics with push notifications
- ✓ Add license plate recognition, face recognition and people counting

## Cloud VMS Includes

### SECURE CLOUD BACKUP

In addition to 24/7 recording on-site, store relevant video at a secure off-site location.

### WEB AND MOBILE ACCESS

Use a web browser or the CheckVideo app to log into the cloud VMS and view live, playback recorded video or use our advanced search engine to find video in seconds.

### POWERFUL VIDEO SEARCH ENGINE

An industry-first search engine enables searches in seconds, even for multiple cameras.

### VIDEO ANALYTICS

Acts as a video sensor by detecting a person or vehicle. Instant push notifications to email or mobile app.

### UNIFIED MANAGEMENT INTERFACE

Provides single-point management of all appliances, with automatic time synchronization across customer locations.

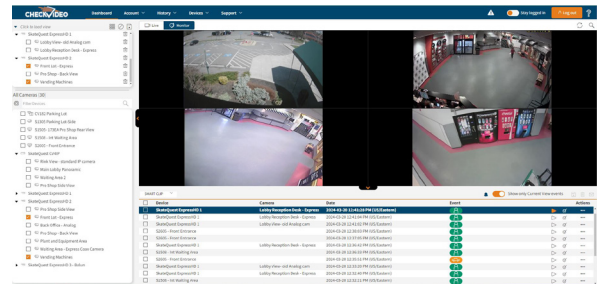

### CYBER-SECURITY INCLUDED

Encrypted communications and secure updates ensure cybersecurity.

## CheckVideo Portal

The CheckVideo portal includes end-user functionality such as video viewing, recorded video playback, video search, export and share. It also includes advanced functionality for multi-camera viewing, smart monitoring, auto-tours and more.
