

CheckVideo Search

Instant Search Across All Cameras and Sites.

Unmatched speed. Unrivalled accuracy.

A complete search experience, fully supported by CheckVideo's Cloud managed service to deliver what you need, when you need it, faster than anyone else.

AI-Powered Search Across All Footage – Instantly

Your cameras see everything — but can you find the footage that matters? CheckVideo's Search lets you instantly search, track, and respond — across all cameras and all sites — with unmatched speed, simplicity, and AI precision. CheckVideo gives you unparalleled video search capability to save time finding the footage you need.

Area Search

Define zones in your video frame and get real-time alerts when activity occurs.

- Faster search on a specific area
- Reduced noise as area isolated from rest of frame events

Appearance-Based Search

Take a snapshot from any event clips—CheckVideo's Appearance Search instantly finds matches across your entire camera network. It's so fast, you can filter thousands of events down to a qualified match in less than 5 seconds.

- No color filters or object labels required
- No AI model training or manual tagging
- Higher-fidelity accurate results
- Works immediately and intuitively, right out of the box

Full-Resolution Results

- Unlike other systems that compress footage, CheckVideo delivers original, high-quality video every time.
- Investigate with confidence
- No dropped details, no grainy playback

Stackable Filters

Search smarter—not harder. Combine appearance, motion, or object type in the same search to drill down to exactly what you need to get a full picture of an event.

Why It Matters

Speed

Scrubbing hours of footage is history. CheckVideo cuts search time from hours to minutes—across all your cameras.

Simplicity

No need for AI training, data labeling, or forensic expertise. Just click, search anything, and go.

Scalability

Search across a single building or an entire portfolio. Kastle scales effortlessly in seconds with out the lag time of others.

Trustworthy Results

We pair our AI tools with human support. Kastle's managed service ensures your system works when it matters.
