

Automotive: Smart Security Solutions

Automotive Dealership Security, Powered by CheckVideo and Security Technology of South Texas

CheckVideo has partnered with **Security Technology of South Texas** to deliver intelligent, cloud-managed video surveillance backed by trusted local monitoring and support. CheckVideo alerts you instantly to activity on your lot, while Security Technology of South Texas verifies incidents in real time and coordinates response when action is needed. Whether on-site or remote, your dealership remains protected.

CheckVideo can **leverage existing camera systems**, layering AI analytics and monitoring services on top of what you already have. This approach keeps installation and connection costs extremely low while modernizing after-hours security without ripping and replacing infrastructure.

FEATURES

- ✓ Video Analytics
- ✓ Offsite Video Backup
- ✓ Instant Search
- ✓ Push Notifications
- ✓ Health Monitoring
- ✓ Works with existing camera systems

REDUCE OVERALL SECURITY COSTS- The cost of paying a guard to physically patrol your auto dealership is often more expensive compared to the affordable costs of implementing a virtual guard system.

IMPROVE CUSTOMER SERVICE- Your cameras become a force multiplier. Search for customer activity on your lot. Manage and track personnel, deliveries, and activity on the sales floor.

STAY INFORMED - With push notifications to your mobile phone CheckVideo can alert you to customers coming in or intruders on the property. Using just a web browser you can keep tabs on your dealership from anywhere in the world.

MONITOR MULTIPLE LOCATIONS - With the power of the cloud and video analytics, a single person can watch tens or even hundreds of cameras over multiple locations.
