

AI Powered Construction Site Security

Protect Assets. Verify Threats. Monitor Progress - from Anywhere.

CheckVideo delivers a cloud-based video security solution designed for active construction environments. Built for wide-area coverage and remote job sites, CheckVideo combines intelligent video monitoring, managed services, and proactive system health checks to help reduce loss, improve response times, and maintain full site visibility.

CLOUD MANAGED SOLUTION - CheckVideo's next generation solution does not require server provisioning, software integration and management, significant time or resources.

INTELLIGENT VIDEO SEARCH & ALERTS - AI-powered video search and real-time alerts help quickly identify theft, vandalism, and unauthorized activity. Events are easy to find, review, and act on.

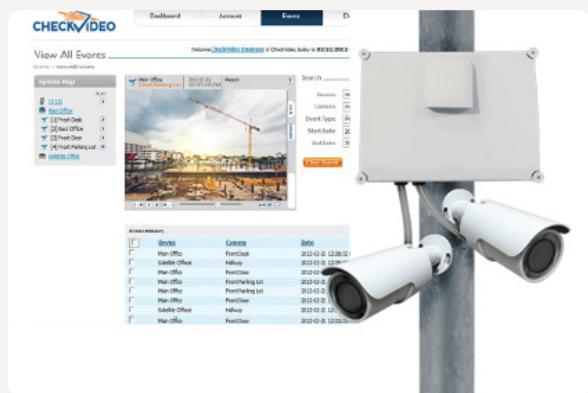

MONITOR MULTIPLE LOCATIONS - With the power of the cloud and video analytics, a single person can watch hundreds or even thousands of cameras over multiple job site locations.

REMOTE VISUAL AUDITS - View site activity over time, perform remote visual audits, and monitor project progress without visiting the job site. Secure portal access allows multiple stakeholders to stay informed from anywhere.

HEALTH MONITORING - Our devices monitor their own health and alert within minutes if any component, including your legacy cameras, have an issue.

- ✓ Offsite backup – no single point of failure
- ✓ AI-Powered person and vehicle detection
- ✓ Lower IT and maintenance costs
- ✓ Higher network security and availability
- ✓ Automatic software and feature updates
- ✓ Unlimited users, locations, and cameras
- ✓ Built to perform in changing light and weather
